

## on-site mini shops

In operation since 1980, DTE Rail Services (DTERS) provides a wide range of expert and economical railcar maintenance, repair and storage services. And, with many organizations realizing the advantages of dedicated, on-site mini shops, DTERS can tailor your mini shop to meet the needs of your operation, regardless of your industry, location or type of equipment (excluding tank cars.)

DTERS qualified and trained personnel will evaluate your needs quickly. Your on-site mini shop could be up and running in weeks. DTERS staffs the operation and provides the necessary equipment to get the job done right and on time.

With a DTERS on-site mini shop, you maximize the use of your equipment with on-site personnel exclusively focused on your needs. Our inspectors spot problems that could lead to shipping delays. Your DTERS mini-shop will reduce turnaround times for repairs and eliminate empty mileage charges and idle railcar time. The bottom line for you? Overall cost savings.

DTERS can also develop a preventive maintenance program to improve the overall condition of your equipment and help reduce costly railroad bills. All types of repairs can be performed, from minor ones to heavy wreck and program repairs.

### **DTERS On-Site mini shops can help you:**

- Keep equipment in service longer and reduce costly railroad repairs.
- Eliminate down time getting equipment to and from the shop.
- Correct safety hazards.
- Eliminate problems that prevent equipment from being loaded or unloaded.
- Eliminate potential for further damage.
- Comply with AAR and FRA.
