

mobile repairs

In operation since 1980, DTE Rail Services (DTERS) provides a wide range of expert and economical railcar maintenance, repair and storage services. Our experienced staff can reduce, and in many cases eliminate, the need to take cars out of service. All of our mobile repair personnel are AWS certified and qualified to perform AAR/FRA inspections. Our crews follow both our stringent safety policies and yours.

DTERS handles complete mobile repairs. We dispatch directly to your site and work on all types of equipment, except tank cars. Call DTERS and we'll travel to your location within 24 hours, depending on material availability. Once the extent of repairs is determined, DTERS mobile crews quickly handle problems, allowing you maximum use of your equipment.

We service territories from our home bases in Nebraska and Indiana. Travel distance is determined based on the specific repairs and quantity of cars.

Let DTERS mobile repair units work for you. With personal attention, equipment control and cost-effective savings, DTERS Mobile Services keeps you on track.

DTERS Mobile Units can help you:

- Keep equipment in service longer and reduce costly railroad repairs.
- Eliminate down time getting equipment to and from the shop.
- Correct safety hazards.
- Eliminate problems that prevent equipment from being loaded or unloaded.
- Eliminate potential for further damage.
- Comply with AAR and FRA.
